

Gas Turbine, Metals and Alloys Sourcing

Industrial organization today have the duty to globally ensure the economic and the environmental issues by recycling and resourcing to preserve scarce natural resources and reduce pollution.

Metal recycling is a competitive global industry that provides essential secondary raw material for metals

manufacturer. It enables a significant reduction in use of energy and virgin resources. Using scrap metal, lessen the use of precious natural resources which would be needed to make new metal compounds.

One Power Services has been at the forefront of the profession, providing precious metals reclamation services to industrial and commercial industry.

To enable us to help you, One Power Services have a team with extensive

technical experience and knowledge that enable us to offer end-to-end solution to maximize your revert metal value. With our constant investment in new diverse techniques and practices, we are devising new processes that combined with our approach, will tackle your reclaim needs of your revert scrap.
